

PRODUCT CATEGORY - DRESSINGS

Antimicrobial Dressings

Antimicrobial dressings are wound covers that alter the wound bed bioburden. Indicated to help reduce the risk of infection in partial- and full-thickness wounds, over percutaneous line sites and surgical incisions or around tracheostomies. Available as sponges, impregnated woven gauzes, film dressings, absorptive products, island dressings, nylon fabric, non-adherent barriers or a combination of materials. The ability to handle exudate depends on the characteristics and composition of the product.
