

# 14<sup>th</sup> ANNUAL INTERNATIONAL INTERPROFESSIONAL WOUND CARE CONFERENCE

Abu Dhabi National Exhibition Centre (ADNEC), UAE | 4 - 5 March 2023

## CONFERENCE OBJECTIVES

It is a great pleasure and honor to host the 14th Abu Dhabi Wound Care Conference, in conjunction with the International Inter-Professional Wound Care Group (IIWCG), on March 4 & 5, 2023, to be held in ADNEC, Abu Dhabi, United Arab Emirates.

Since its inception, the conference has provided wonderful scientific opportunities to a growing number of participants from around the world. Keeping in tradition, the 14th AWCC will cover a wide spectrum of topics in wound healing, diabetic foot prevention & management, skin tears and latest research findings. Proceedings will include lectures from internationally distinguished speakers as well as oral and poster presentations.

The conference aims to offer latest information and challenging evidences to all subjects relating to wound care. We embody outstanding experts in the industry, not only from the Middle East but also from America, Europe and other parts of the world to provide a unique international flavor to our scientific sessions. Each participant will have profound learning experiences from these all-encompassing features of the scientific program.

Join the conference and benefit from expanding your network. Meet new friends, greet old colleagues and discuss new insight gained as together we mark a decade of wound care.

**Abu Dhabi Wound Care Conference 2023** looks forward to welcoming you to the majestic city of Abu Dhabi.

**Ms. Hiske Smart**  
Conference Chair  
President, IIWCG

**Ms. Gulnaz Tariq**  
CEO, IIWCG  
President, WUWHS

- Introduce interactive practice change workshop which highlights on diabetic foot offloading algorithm, lunch of wound care kit and pressure injury prevention pathway.
- Set the ground for intensive research and evidence based practice, discuss Artificial Intelligence (AI) in wound care
- Awarding rising stars among the wound care enthusiasts.
- Present pediatric wound healing insights.
- Introduce new advances in wound healing which includes fractional lasers, Stem Cell and oxygen therapy.
- Discuss about outlook of skin tears.
